Terms

The Open Source Mailing Software installed on Speedmail - Private Email Server is configured for sending emails from a single domain name of the client. Using the Private Email Server to promote commercial mass mailing services and/or to send bulk/mass mails of third-party clients is strictly prohibited.

Sending Bulk Email on VPS and SPEEDMAIL Private Email Servers.

Legitimate bulk mailing lists are permitted on our VPS - Network if the bulk email meets the following criteria:

- 1) The recipient has confirmed his willingness to be added to the distribution list of the mailing, by responding to a verification email, or, otherwise, verifiably confirming permission. (Evidence of such must be retained and available by request.)
- 2) Messages should include: Valid headers, removal instructions, and information on the method by which the subscribed address was obtained.

All accounts on our web servers are subject to the terms and conditions Displayed on <http://www.mumbaihosting.com/hostingterms.htm>
